UIScrollView

Managing the Content

Managing the Content Size and Offset

`contentSize`

The size of the content view.

`contentOffset`

The point at which the origin of the content view is offset from the origin of the scroll view.

– `setContentOffset:animated:`

Sets the offset from the content view's origin that corresponds to the receiver's origin.

UIScrollViewDelegate

Responding to Scroll View Interactions

`delegate`

The delegate of the scroll-view object.

`UIScrollViewDelegate`

The methods declared by the `UIScrollViewDelegate` protocol allow the adopting delegate to respond to messages from the `UIScrollView` class and thus respond to, and in some affect, operations such as scrolling, zooming, deceleration of scrolled content, and scrolling animations.
